

Frontiers in Bioscience-Elite

Open Access

- Open-Access Model
- Print ISSN: 1945-0494
- Electronic ISSN: 1945-0508
- Established: 2009
- Publication Frequency: 4 issues per year
- Review Time: 4-6 weeks
- CiteScore: 5.4
- Indexing: MEDLINE (PubMed), Scopus, DOAJ, CABI

Editor-in-Chief

Baohong Zhang, PhD

Department of Biology,
East Carolina University
Greenville, NC, USA

Aim & Scope:

Frontiers in Bioscience-Elite (FBE) is an international, peer-reviewed, open-access journal mainly dedicated to applied biosciences, spanning biotechnology and applied microbiology. Founded in 2009, it serves as a bridge between fundamental biological research and practical applications in medicine, food, agriculture, industry, environment, and energy. The journal is intended for researchers in the field of biotechnology, microbiologists, bioengineers, scientists and technical professionals engaged in industrial, environmental, and medical microbiology. In addition to original research articles, *FBE* also considers other manuscript types such as short communications, systematic reviews, reviews, opinion articles and editorials.

Topics of interest include but are not limited to the following:

- Methods and technological advances in biotechnology
- Genetic engineering
- Genome editing and CRISPR technologies
- Cell, tissue and organoid culture models
- Stem cell engineering and disease models
- Nanobiotechnology and biomaterials
- Disease diagnosis, therapeutics and vaccines
- Antibody Engineering
- Drug discovery and delivery
- Food fermentation, probiotics and prebiotics
- Functional food and natural product development
- Biological breeding and genetic improvement of plants and animals
- Plant protection and stress resistance biology
- Synthetic biology and metabolic engineering
- Enzyme Engineering
- Biocatalyst engineering
- Biosensors and process control
- Biodegradation and bioremediation
- Bioenergy and biofuels
